

This pixie isn't all sweetness and light. Thanks to longer perimeter lengths, manic texture and a sultry, dusky violet hue, there's also an enticing amount of depth and drama to the look. It's truly a high point of **Farouk Systems'** new **Beauty Bash Collection** and an exciting option for short, sexy hair!

vixen pixie and vibrant violet color

color

1. Create diagonal back partings and position the foil under a sliced section. Apply Formula A. Begin at the roots with the brush angled vertically and gradually switch to a horizontal position as work progresses to the ends.
2. Work through the interior section in this manner, applying the color in diagonal back slices. Process to the desired level of lift. Rinse, shampoo with **CHI Infra Shampoo** and seal the hair with **CHI Ionic Color Lock** for five minutes. Dry the hair.
3. Apply Formula B to the prelightened slice sections. Process with low heat for 10 minutes and cool for five minutes. Rinse, shampoo and reseal the hair.

cut

1. Divide the head into eight sections.
2. Lift the center nape section and create the guide. Work to each side using a traveling guide.
3. Direct the last sections behind the ear on both sides toward the previous guide to slightly increase the length.
4. Direct side sections toward the highest point of the ear. Cut vertically using a stationary guide.
5. Use a razor arching technique and traveling guide to cut the crown area.
6. Overdirect the fringe towards the sides using a razor and pinching the ends.
7. Lift interior sections and notch them vertically to create volume and softness.

style

textured look: Apply **BioSilk Volumizing Therapy Root Lift** to damp hair. Using a **CHI TOUCH Hair Dryer**, project hair towards the face at a 90-degree angle. For added volume, apply **CHI Twisted Fabric**, massaging the product into the root area for maximum lift and support. Finish with **BioSilk Volumizing Therapy Texturizing Powder**.

smooth look: Apply **BioSilk Volumizing Therapy Root Lift** to damp hair. Using a **CHI TOUCH Hair Dryer**, dry interior sections with a medium round brush. Dry the perimeter with a vent brush, then smooth with a **CHI G2 Hairstyling Iron**. Combine **CHI Molding Clay** with a drop of **CHI Silk Infusion** and work through from scalp to ends. Finish with **CHI Infra Texture Hair Spray**.

CHI COLOR FORMULAS

formula a: equal parts CHI Blondest Blonde + CHI Ionic Color Generator (10- or 20-volume, depending on existing level)

formula b: CHI Chromashine Vibrant Violet

who did it
