Contour Layered Cut

Andrea Henty @andreahenty

- 1) Section from the occipital bone up and move all hair underneath out of the way. Let top section down to begin layering.
- 2) Using your client's desired part as a guide, slightly elevate the front section and bring it forward across your client's face until it reaches their nose. Using the tip of their nose as your starting point, layer this section to the desired length. Repeat on the other side through each top section.
- 3) Dropping the bottom section down, continue to bring each section forward and cut to length. This technique will create a soft U-Shape throughout the entire head.
- 4) Bring all hair to the back to check your shaping and clean up any areas.

PRO TIP: Drea says, 'This is a modern take on soft, round layers. Use slide and point cutting techniques throughout the haircut to create an elongated, soft look.'

DREA'S GO-TO SCISSORS FOR CONTOURED LAYERS:

PARAGON II

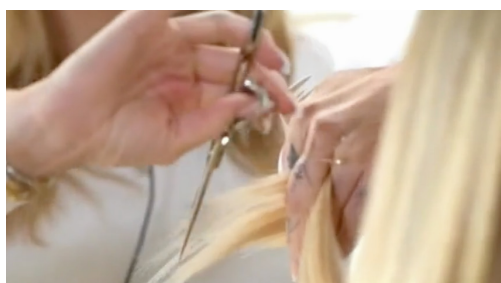

Create natural, blended layers (perfect for extensions clients) with this class!

BTC**U**UNIVERSITY

How To Cut & Style Extensions Like A Celebrity Stylist

ONLINE CLASS

@ANDREAHEPTY TEACHES YOU:

- Drea's signature cutting techniques to preserve length while blending extensions.
- How to create natural layering and avoid exposing the application area.
- Strategies for staying organized while cutting extensions.
- Styling techniques for the perfect blended finish.
